

RUDRAMANI SINGHA

+1 (646)-785-6865 | rgs2151@columbia.edu | columbia.edu/~rgs2151

EDUCATION

Columbia University

Master of Science in Biomedical Engineering

Aug 2022 - Feb 2024

New York, USA

Awards: Shardashish Interschool Fellow (1 of 500), Data Science Institute Scholar

Key Courses: High-Performance ML, Competitive Programming, Bayesian Inference

University of Mumbai

Bachelor of Engineering in Information Technology

Jun 2018 - Jul 2022

Mumbai, India

Key Courses: Distributed Systems, Computer Networks, Operating Systems, System Administration, Data Science

EXPERIENCE

Columbia University, School of Engineering and Applied Science

Aug 2024 - Present

Research Analyst, under Prof. Nuttida R

New York, USA

- Leading U.S. Army-funded research on interpretable ML models for decoding latent perceptual decision-making.
- Developed a scalable multi-agent reinforcement learning framework in JAX, extending DeepMind's RLax and OpenAI Gym with joint agents and environment to simulate emergent brain dynamics.
- Designed, deployed, and managed a private high-performance GPU cluster (12 ADA RTX 6000 and 26 RTX 4000 GPUs) supporting continuous research computation.

WeEvolve Cognitech Inc.

May 2024 - Aug 2024

ML Engineering Intern

New York, USA

- Developed a scalable healthcare platform with Django to centralize patient data and power predictive care across clinics.
- Integrated LLMs (e.g., GPT-style models) into a conversational interface for scheduling, data retrieval, and health goal tracking, reducing manual scheduling tasks by 60%.
- Applied retrieval-augmented generation (RAG) to extract tailored insights from medical histories, improving clinical decisions and patient engagement.

Kriash Corp.

Feb 2024 - May 2024

Software Engineering Intern

New York, USA

- Built neonatal monitoring platform with ML models deployed on low-power microcontrollers for real-time anomaly detection.
- Processed multimodal vital signs (e.g., temperature, heart rate, SpO2, humidity) to trigger alerts in clinical settings.
- Developed HIPAA-compliant REST APIs for seamless data integration with existing medical systems.

Columbia University, Department of Statistics

Aug 2023 - Feb 2024

Research Assistant, under Prof. Liam Paninski

New York, USA

- Analyzed latent cognitive states in mice using advanced computer vision pipelines and body landmark tracking.
- Developed semi-supervised contrastive temporal smoothing models to enhance prediction accuracy in behavioral research.
- Deployed toolkits to measure representational similarities in the brain, used by the International Brain Laboratories.

SKILLS

Tools: PyTorch, JAX, TensorFlow, Keras, PyMC, Scikit-learn, Spark, Elasticsearch, Pandas, Git, Flask, Django, Docker, AWS, GCP

Languages: Python, R, C/C++, Java, CUDA, STAN, MATLAB, SQL, JavaScript, LaTeX

ML Pipelines: Retriever-Reader, Object Detection, Image Segmentation, Abstractive Summarization, Question Answering (IRQA)

Certifications: [Reinforcement Learning](#), [Amazon Web Services](#), [TensorFlow in Google Cloud Platform](#), [Big Data \(UCSD\)](#)
